DMA – You need to review and study Dynamic Memory Allocation

STY- It seems like you did not study enough for this test

TLK - Please talk to me at your earliest convenience.

TMP – You need to review and study templates and their usage

RD – Read the question properly and only do what the question asks and nothing more

MV – Review move operations

CHT – I seems like your answers are copied from someone else, please see me as soon as possible

DRP – From what I see in your test either you have to study much harder or drop the subject

GJ – Good Job, Very nice way of doing this.

ATT – Please read the question and pay attention to what it asks before answering the question.

AUT – Review "auto"

RNG – Review Range-based loop

REL – Your answer is not answering the question asked. Please read the question carefully and if you don't understand what it wants, ask your teacher to explain it to you.

CPY – You need to review copy constructors and dynamic memory allocation from OOP244.

VIR – You do not have a clear understanding of virtuals and abstract base classes, Please review them from your OOP244 and OOP345 notes and come to me with questions if needed.

SCP – review scopes and shadowing

OPR – review operator overloading from OOP244

RUS- Reuse you code to shorten your source code. Copy and move constructors can be written by Calling the assignment operator and move assignment operator.

RTN – You should not have multiple return statements in a function.
